# Rationale & Objectives

A continuous assessment of the competitive environment is widely recognized as one of the highest priority management responsibilities -- crucial to business survival, growth and profitability. Timely and factual competitive intelligence is vital to the success of all business functions, especially Planning, Marketing, R&D and Manufacturing.

In a highly dynamic and fragmented agrochemical market, besieged by intense competition, the ability to anticipate new product introductions and marketing strategies is particularly important...and spells the difference between success and failure.

The **Top 10**, a unique series of market intelligence studies first introduced by VENTURE PLANNING GROUP in 1987, is designed to provide industry executives with strategically significant competitor information, analysis and insight, critical to the development

and implementation of effective marketing and R&D programs. The study's major objectives include:

- To establish comprehensive, factual and cost-effective information base on performance, capabilities, goals and strategies of the world's leading agrochemical companies.
- To help current suppliers realistically assess their technological and marketing capabilities vis-a-vis leading competitors.
- To assist potential market entrants in evaluating prospective acquisitions and joint venture candidates.
- To complement organizations' internal competitor information gathering efforts by providing strategic analysis, data interpretation and insight.
- To identify least competitive market niches with significant growth potential.

## Study Content

### WORLDWIDE MARKET OVERVIEW

The study will provide a strategic overview of the worldwide agrochemical market, including:
