# ABOUT THIS REPORT

## Rationale

A strategic assessment of the competitive environment is becoming widely recognized as one of the highest priority management responsibilities, the task crucial to business survival, growth and profitability. Timely and factual competitive intelligence is vital to the success of all business functions, particularly Planning, Marketing and R&D.

In a highly dynamic and fragmented chemical market, besieged by intense competition and rapid pace of technological innovations, the ability to anticipate new competitive product introductions and marketing strategies is particularly important... and can spell the difference between success and failure.

## Study Content

"THE Top 10 WORLD'S LEADING CHEMICAL COMPANIES" is a unique multiclient study prepared by Venture Planning Group in order to provide the industry executives with strategically significant competitor information, analysis and insight crucial to the development and implementation of effective business, marketing and R&D programs. The study's major objectives include:

- To establish a comprehensive, factual and cost-effective information base on performance, capabilities, goals and strategies of the world's leading chemical companies.
- To help current suppliers realistically assess their financial, technological and marketing capabilities vis-a-vis leading competitors.
- To assist potential market entrants in evaluating prospective acquisitions and joint venture candidates.
- To complement organizations' internal competitor information gathering efforts with strategic analysis, data interpretation and insight.

## Methodology

The Top 10 report is based on a combination of primary and secondary information sources, including data generated at chemical industry shows, marketing conferences and scientific symposia, as well as Venture Planning Group's proprietary files which were developed in the course of continuous monitoring of the industry, over 100 syndicated studies, and numerous single-client assignments. This database contains current information on major chemical companies, technologies, products and executives worldwide.

Moreover, a comprehensive review of the Top 10 companies' product and financial literature, business and technical periodicals, and pertinent industry analyst reports was conducted.
