This package includes the following reports:

Mobile Commerce in Virtual and Augmented Reality

Market Opportunity: Mobile Phone Augmented Reality

Low Cost Pervasive Computing: Market Opportunities in Embedded Computing and The Internet of Things

Next Generation Network China and South Korea 2012-2017: Market Trends, Challenges and Prospects

Next Generation Network Japan: Market Trends, Challenges and Prospects 2012 - 2017

SIP Trunking: Next Generation Call Processing Drives Lower Cost Communications

Tekelec: LTE Drives Opportunities in Diameter, Policy and Subscriber Management

Self Organizing Networks (SON): Challenges and Market Opportunities for LTE and Beyond, Second Edition

LTE Support of the Smart-grid Solutions, Applications, and Market Outlook

LTE Strategy 2012 - 2017

The Definitive Analysis of Broadband Wireless Networks: WiMax, WiFi, LTE, and 4G Infrastructure

Self Organizing Networks (SON): Challenges & Market Opportunities for LTE and Beyond

Mobile Commerce in LTE: The Future of Commerce in 4G and Beyond

IMS Challenges and Opportunities in Multi-Application Environment

Market Opportunity: Presence in IMS

The SOA-enabled Path to Integrate Legacy and IMS Networks: Market Analysis & Forecasts 2012 - 2016

IP Multimedia Subsystem (IMS) : The Market for Applications & Services 2012-2017

Next Generation Messaging over IMS

IMS Applications: Moving Beyond Voice over LTE (VoLTE)

Market Opportunity: Call Continuity in Voice over LTE (VoLTE)

Free VoIP over Wireless vs. VoLTE

LTE Feasibility, Applications and Potential by Region 2011 to 2015

Unified Communications (UC) over IP Multimedia Subsystem (IMS): Solutions and Market/Business Analysis

Next Generation Network Application Market Outlook and Business Drivers

Monetizing the NGN Investment: Market Prospects and Business Casefor IMS and SDP based Applications

Market Opportunity: Next Generation Network (NGN) OSS/BSS

Next Generation Network OSS/BSS Market and Forecast 2011-2016

The OSS Value Chain: Evaluating the Ecosystem, Players, and Future of Operational Support Systems

Mobile Networks Evolving to all-IP Backbone (Second Edition)

Market Opportunity: Service Delivery Platforms (SDP)

IP Multimedia Subsystem (IMS) Status Report: Emerging from the Trough of Disillusionment

IP Multimedia Services over WiMAX: Opportunities for Service Providers and Corporations

Effective use of Network Management Software (NMS) and Operational Support Systems (OSS)

Understanding Service Delivery Platforms (SDP)

IP Multimedia Subsystem (IMS): The Commercial Rollout of Applications

Next Generation Messaging: Evolution to IMS and SIP

Network Monitoring in Transition: Business Opportunities in the shift to IP/IMS

Understanding IP Multimedia Subsystem (IMS)

IMS: Driving New Business Models and Opportunities

Wireless Softswitch: Evolving the Core Network for NGN
